Call for Papers

ISMA'09 is the sixth of a series of symposia focusing on theoretical and practical aspects of Mechatronics. The symposium covers the synergetic integration of mechanical engineering with electronics, intelligent control, and design and manufacturing of industrial products and processes. Topics of interest include, but not limited to:

- Process control, distributed systems, and remote monitoring
- Smart manufacturing technologies
- Intelligent systems
- Industrial automation and embedded systems
- Robotics and autonomous systems
- Signal processing and system identification for Mechatronics
- Unmanned Vehicles
- Machine vision
- Mobile actuator and sensor networks
- Sensor design and sensor fusion
- MEMS and NEMS
- Education & Entrepreneurship in Mechatronics
- Biomedical applications
- Navigation, localization, and simultaneous mapping

Prospective participants of ISMA'09 are invited to submit their full papers using our TrackChair online submission system at:

<http://isma09.trackchair.com>

The authors should follow the guidelines posted on the symposium website:

<http://www.isma-conf.org/submission.html>

Submitted papers will be peer-reviewed. Accepted and presented papers will be published in the proceedings of the ISMA'09 symposium. Selected papers will be published in a special issue of a reputed journal. The organizing committee welcomes proposals for special sessions and tutorials to be held in conjunction with ISMA'09. Please send your proposals by email to: isma09@aus.edu.
